

# QG-Sitelink3D v2 Joining a remote site in 3D-MC

Currently, Sitelink3D v2 sites are only supported by 3D-MC v15.x releases and the Haul Truck mobile app.

Sitelink3D v2 gives you the option to join sites that you are currently not on with a Site ID and Access PIN.

To add the site, go to Data > Sites...

In the Sites menu, you will see a list of all sites currently loaded onto that display. Any Sitelink3D hosted site will be shown with a Sitelink3D connectivity icon to the left of the Name.

To add a new site, hit the Add... button.

In the Add Site menu, select Existing Sitelink3D Site from the list.

Now, hit the Next button.

The screenshot shows a dark-themed dialog box titled "Add Site". Under the heading "Add:", there are three radio button options: "New Local Site", "New Sitelink3D Site", and "Existing Sitelink3D Site". The "Existing Sitelink3D Site" option is selected, indicated by a filled circle. At the bottom right of the dialog, there are two buttons: "Next" (highlighted in blue) and "Cancel" (greyed out).

From the Add drop-down list, choose by Site ID.

Add: by Site ID

Site: by Site ID

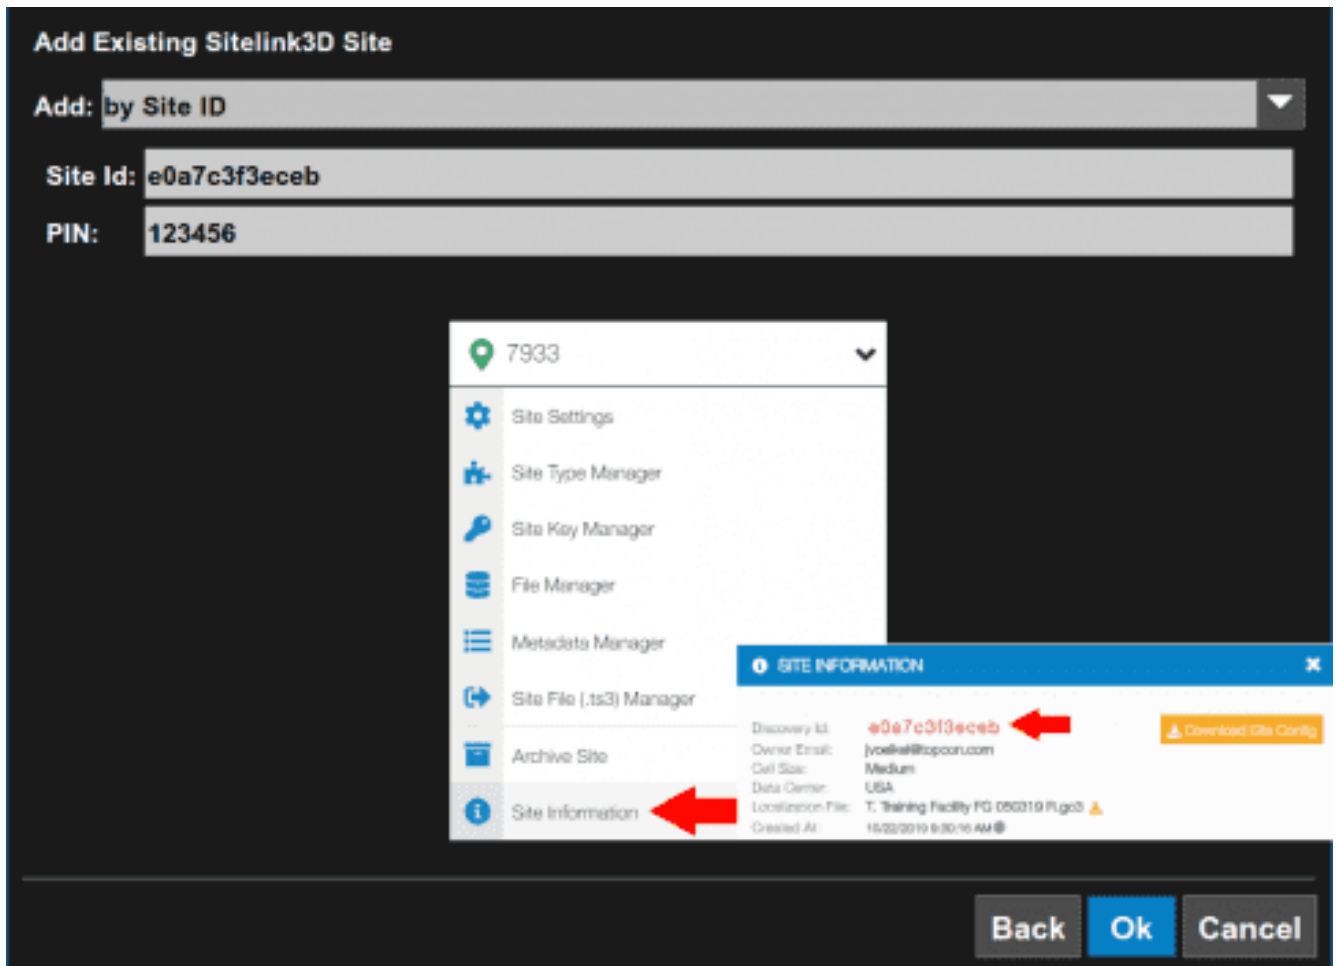

PIN: by Sites in Vicinity

Back Ok Cancel

You will be required to enter a Site ID. This ID can be found in the Sitelink3D web portal by selecting the job menu and going to Site Information.

If an Access PIN was created, it can be entered as well. Access PINs are optional but allow anyone to connect to the site if they have the Site ID.

Now, hit the Ok button.

You should now see the message: Site has been successfully added.

Make sure it's selected from the list, and hit the OK button.
