Regulation 13 Coordinate and Metadata Update

Please Read: Important Information

1 What

The AllDayRTK team advises that there are multiple CORS sites in the AllDayRTK Network that will undergo coordinate and metadata updates to align with new Regulation 13 certified coordinates.

2 When?

21/05/2024, 17:00 AEST

3 Impact!

List of CORS sites undergoing Regulation 13 coordinate and metadata updates:

Base Station 4CID		
3WKB	5BO2	5CL3

Users directly accessing RTK corrections or RINEX services from the updated sites or working in nearby network areas may notice a coordinate shift within positional uncertainty limits. Users who see differences that exceed positional uncertainty are advised to re-localise or re-adjust GNSS observations to align with the new Regulation 13 coordinates. Positional uncertainty values for sites can be found on the Regulation 13 certificates published on the AllDayRTK webmap accessible via: <https://www.apptella.com/alldayrtk/map/>

4 Recommendation

We advise that users check existing controls to ensure that any differences found does not affect any pre-existing or future work.

Re-localisation of jobs and control points may need to be performed to minimise the differences due to the shift and/or change in coordinates.

5 Help?

If you require further information, please contact our AllDayRTK support team.
Thank you for your co-operation.
