

Installation of NZTraverse v9.1

NZTraverse v9 / v9.1 support the 2021 Cadastral Survey Rules

These notes relate to installing v9 or v9.1

PLEASE NOTE: If this is a new installation –

Always install Magnet Office before NZTraverse.

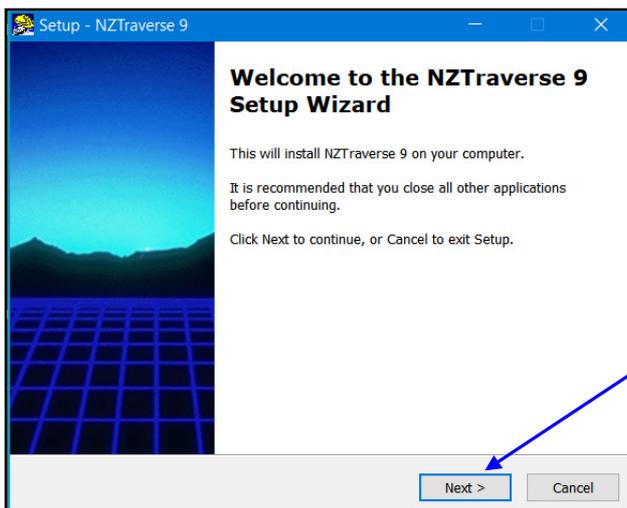

INSTALLATION

The file 'NZTraverse9-setup.exe' or 'NZTraverse91-setup.exe' may be downloaded from our website or it may be provided to you on a USB drive.

Make sure Magnet Office and NZTraverse are closed.

Start the installation by right clicking the executable setup file.

Select "**Run as Administrator**" This dialog is displayed:

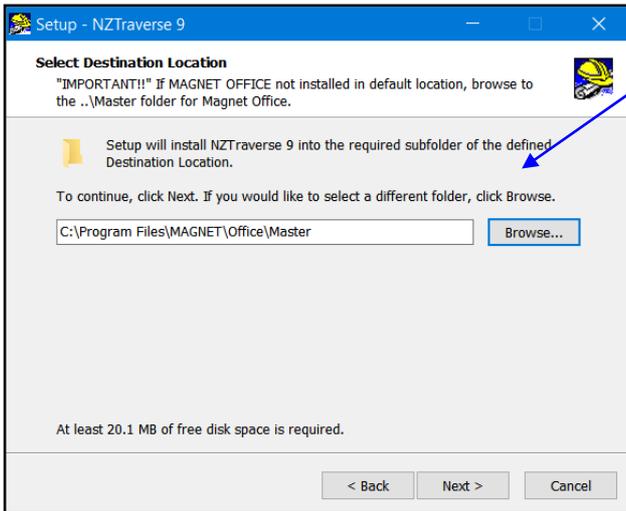

Please click: **Next**

Then read and confirm the licence agreement. And click **Next** button.

The next page has **IMPORTANT** information, so please read and then click **Next** button.

Make sure that the 'Destination Location' for **NZTraverse** is set to the same path used for your **MAGNET Office** installation. If not please Browse to the *..\Master* folder of your Magnet Office installation

The Destination Location must be set to include all levels down to the *Master* folder as shown

Click **Next** to continue

Continue through the prompts, clicking the **Next** button. Then click the **Install** button.

Finally click the **Finish** button to complete the installation and exit from the procedure.

PLEASE NOTE THE FOLLOWING:

The setup process automatically installs **NZTraverse** in the correct subfolder of Magnet Office.

For **MAGNET Office** the default is: C:\Program Files\MAGNET\Office\Master\AddOns\NZTraverse

The 'Destination Location' specified by you must be C:\Program Files\MAGNET\Office\Master

If **MAGNET Office** was installed to another location NZTraverse should be in:

C:\Your selection\Master\AddOns\NZTraverse

The folder specified by you for the 'Destination Location' must be: C:\Your selection \Master

'NZTraverse 9.1 User Guide.PDF' and 'What's new in NZTraverse 9.PDF' and 'What's new in NZTraverse 9.1.PDF' are loaded into ..Master\AddOns\NZTraverse folder with icon shortcuts on the Desktop

'NZTraverse 9.1 User Guide' is up to date and includes all the changes to support 2021 Cadastral Survey Rules. 'What's new in NZTraverse 9' contains all the changes made to ensure compatibility with the new version of Landonline. 'What's new in NZTraverse 9.1' contains details of the minor changes made to correct a couple of items.

Remember that **F1** key opens the Help option.

STARTING NZTRAVERSE

From Magnet Office, use the NZTraverse option – this is found on the Survey menu.

We recommend you always run NZTraverse linked to your Magnet Office dataset, so running NZTraverse from within Magnet Office helps to control your data.

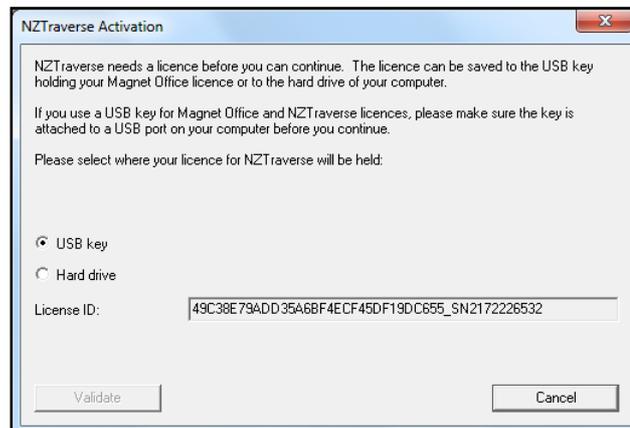

LICENSES

License on USB key:

The following screen will display to enable you to activate your new v9 license on your USB key – please note your display will have different characters to those shown below. V9.1 uses the same licence as v9, so there is no change if upgrading from v9 to v9.1.

If there is no v9 / v9.1 NZTraverse license but you have a Magnet Office license on the USB drive, the License ID is displayed in the field. This includes your Magnet Office serial number.

Please **copy and paste** the characters from the License ID field to an email (do not send us a screen print) and send this to :- magnetsupport@aptella.com

We will send you the new version of the file: 'NZTraverse Licence.txt'

This file should be copied to the **LICENSE** folder on the USB key, overwriting any v7 or v8 license

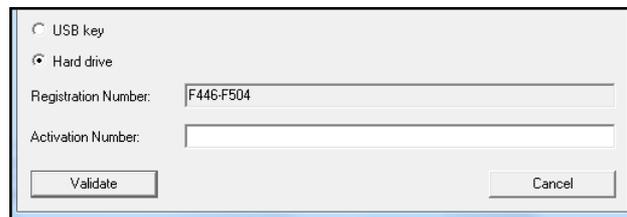

Licence on computer hard drive:

If you are using a USB key for Magnet Office, then NZTraverse license must also be on the USB key.

If your Magnet Office is activated to the computer, the NZTraverse license is held on the hard drive.

If NZTraverse cannot find the USB key it assumes you will license NZTraverse on the hard drive. The Hard drive radio button will be activated. The Registration number will be displayed.

USB key
 Hard drive
Registration Number: F446-F504
Activation Number:
Validate Cancel

Please send the "Registration Number" which will be unique to your hard drive to us at magnetsupport@aptella.com together with a record of your Magnet Office serial number; we will return the "Activation Number".

Copy this number from the email and paste into the Activation Number field. Click *Validate* button to complete the activation.

You can find your Magnet Office serial number on the **About** screen (from Help menu in Magnet Office)

FINALLY

If you have any queries about the installation, please contact us at Aptella (NZ) Ltd.
